

Instructions

Hand out small balls of coloured dough.

Pea size is excellent for little fingers.

Mix the two primary colours together and place new (secondary) colour on empty circle.

What new colour have you made?

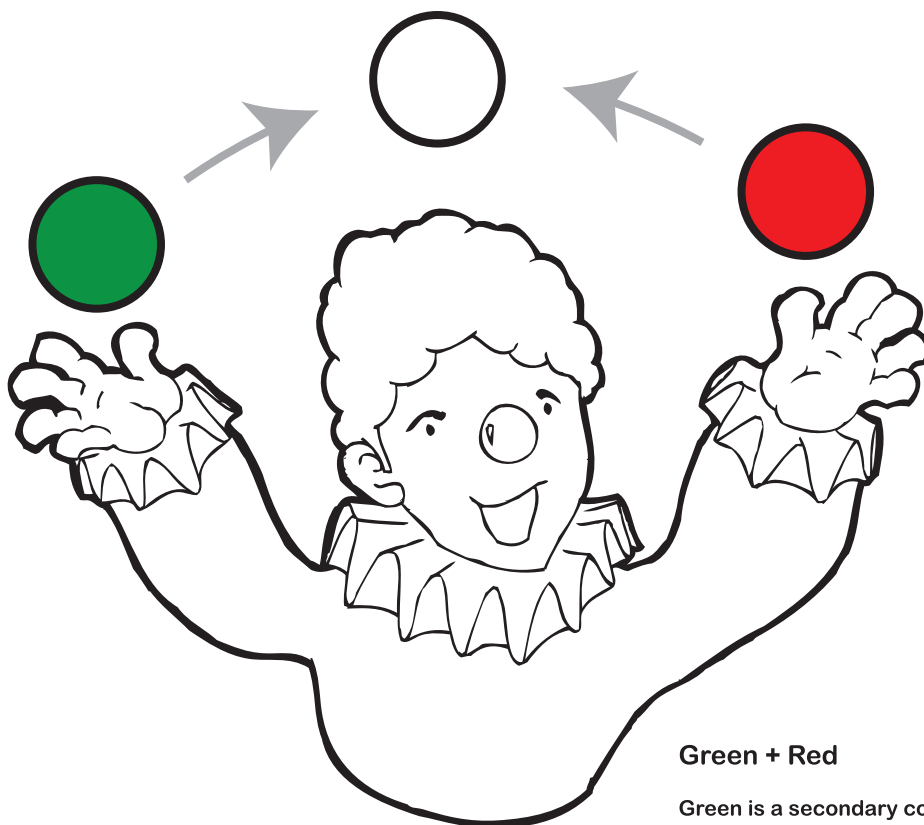

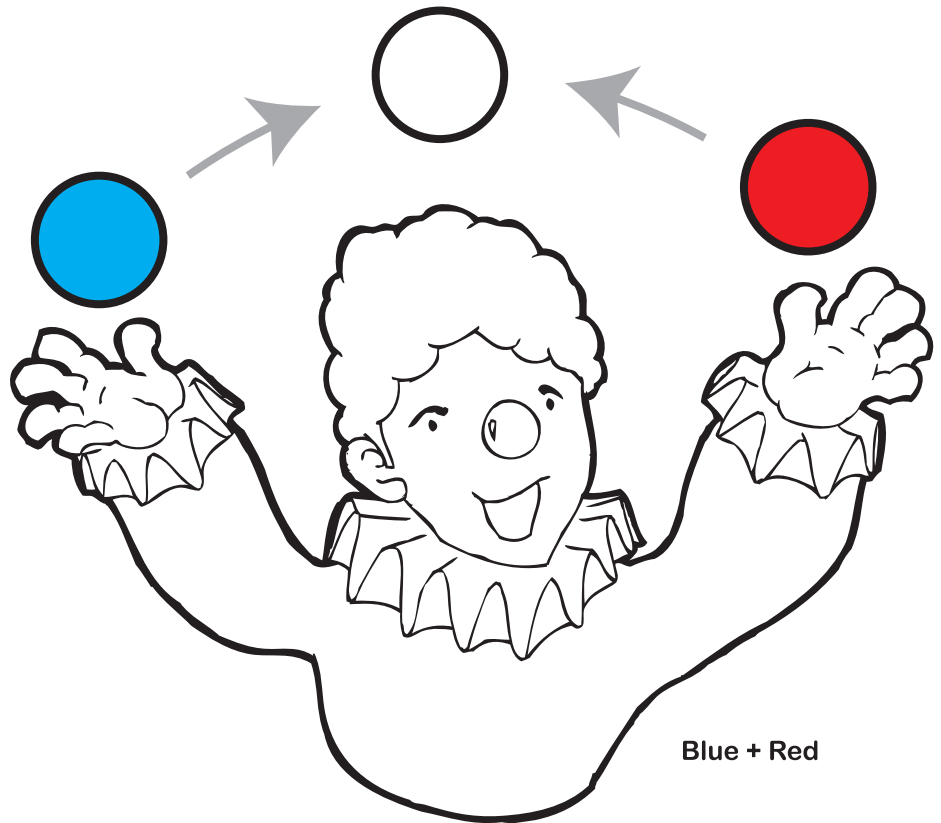

Instructions

Hand out small balls of coloured dough.

Pea size is excellent for little fingers.

Mix the two primary colours together and place new (secondary) colour on empty circle.

What new colour have you made?

Green is a secondary colour - when mixed with red, it will make a tertiary colour.
